

EXPERIENCE

Peloton

User Researcher

New York, NY

Sept 2023 – August 2026

- Led **cross-functional mixed-methods research** across Peloton's **software and e-commerce experiences**, driving improvements in habit formation, subscription revenue, and retention.
- Provided recommendations for our loyalty program that drove a **5% increase in engagement and retention** among new and low-engaged members, exceeding adoption benchmarks.
- **Increased HSA/FSA payment method usage by 7%** in one month by delivering insights and recommendations from a comprehension study and A/B test of design variations.
- **Developed two AI research tools:** a thematic analysis skill that reduced qualitative coding time by ~30%, and a research agent that created study briefs from research questions, streamlining study setup.

Experis

Researcher – Contract with Meta

Remote

June 2022 – April 2023

- Led studies for wearable products, providing insights and recommendations that expanded stakeholders' understanding of user interactions and pain points.
- **Worked with cross-functional stakeholders** on end-to-end UX research projects to ensure insights and recommendations would be actionable.
- **Supported end-to-end research** by recruiting participants, creating research protocols, screeners, interviewing participants, and analyzing data to help inform insights.
- **Utilized key performance indicators (KPIs)** such as task completion rates, time on task, error rates, and user satisfaction ratings to show where improvements needed to be made.

The Pennsylvania State University

Lead Research Assistant

May 2021 – May 2022

- **Conducted a literature review** to identify gaps in existing research to influence our study's design on how stress affects memory.
- **Managed two research assistants** during data collection, training them on study procedures and tools.
- **Presented findings to domain experts** at my college's research symposium, winning an information literacy award.
